

Bharat Singh

Introduction

Dynamic and results-driven API Developer with 5+ years of experience in API, Offer and Coupons features, and Single Page Application development. Strong expertise in building scalable and reliable systems for e-commerce platforms. Proficient in Data Structures & Algorithms.

Overview

- 2+ years of experience developing product offers, user coupons, and cart features for a leading beauty e-commerce platform using NestJs, PHP, Redis, and Kafka.
- Skilled in optimizing performance of Cart, Checkout, Product Offers, User Coupons, and Personalized Offers in e-commerce..
- 3 years of hands-on experience in web and mobile application development using PHP, Firebase, HTML, CSS, and JavaScript.
- Proven ability to implement product offers, discounts, cart, and checkout flow for users. • Experienced in building robust and efficient offers and coupons modules for e-commerce platforms.
- Strong knowledge of improving API latency and throughput.
- Successfully led the migration of a monolithic codebase to a microservice architecture.

Skills

- Node.js: Extensive experience in Node.js development, utilizing JavaScript and TypeScript for server-side programming.
- NestJs: Proficient in using NestJs framework to build scalable and maintainable APIs and applications.
- Express.js: Strong understanding of Express.js, leveraging its capabilities to develop efficient web applications.
- MongoDB: Skilled in working with MongoDB to design and implement database schemas and perform data operations.
- Redis: Proficient in utilizing Redis as a caching and in-memory data store for high performance applications.
- MySQL: Sound understanding of MySQL database management, including query optimization and data modeling.
- Kafka: Experience in integrating Kafka messaging system for building scalable and distributed systems.
- Kubernetes: Familiarity with Kubernetes for container orchestration and deployment
- HTML, CSS, JavaScript: Proficient in front-end technologies for building user friendly and responsive web interfaces.

- PHP: Experienced in PHP development for web and application backends, with knowledge of frameworks like CodeIgniter.
- Prisma, Sequelize: Familiarity with ORMs like Prisma and Sequelize for database interaction and query building.

Abilities

- Translate business requirements into technical specifications.
- Architect critical features from scratch.
- Strong problem-solving and analytical skills.
- Agile team leadership and organizational abilities.

Experience

SeniorAPI Developer at purple.com - July 2022 - present.

- Revamped Offers and Coupons algorithms using NestJs and Node.js to align with business needs.
- Implemented a robust and efficient product offers and discount module, leveraging Node.js and Express.js.
- Converted APIs from monolithic to microservice architecture using NestJs and Node.js.
- Took complete ownership of product offers and user coupons development.
- Monitored API metrics and implemented optimizations to improve performance. ● Implemented various technical solutions in the Cart module, such as enabling only COD option during payment gateway downtime and enabling wallet + COD options on the payment page.
- Worked on sprint tasks in an agile environment.

Software developer -API Team at purple.com - September 2020 - July

2022. ● Developed APIs using PHP in an agile environment.

- Revamped Product Offers and User Coupons to align with business needs using PHP, Kafka, and Redis.
- Introduced a new type of offer that resulted in a 45% increase in sales during promotional periods.
- Created template-based architecture for dynamic home/sale/promotion/offers pages with drag and drop features.
- Built internal panels for product management.

Software Engineer at invtechnologies

Full time : June 2018 - September 2020, Internship: May 2017 - March, 2018.

- Developed real-time e-commerce websites using HTML, CSS, JavaScript, PHP, and Firebase.

- Created management panels for admins using Firebase and PHP.
- Developed real-time Android applications with Firebase and PHP backend using Android Studio.
- Handled website hosting on shared servers and managed multiple domains.
- Deployed apps on Play Store.
- Developed augmented reality apps using Unity for both iOS and Android platforms.

Education

- Bachelor of Technology in Computer Science - IIIT Nuzvid. **2018**
- Pre-University Course (PUC), MPC.
- Secondary School Certificate (SSC)
